DETAILED ACTION

Response to Communication(s)

1. This office action is in response to the Amendment filed on June 1st, 2009 and the Panel Decision on June 28th, 2010. Claims 14 and 27 are now canceled and claims 1-13 and 15-26 are now pending in the application. Applicant's Pre-brief Conference Request dated 09/01/2009 of the finality of the last Office action is persuasive per panel's decision dated 06/16/2010. As a result, the finality of that action is withdrawn. Delay in prosecution of this application is regretted.

Response to Amendment/Arguments

2. The 35 U.S.C. 102(b) rejection to claims 1-2, 6-9, 15-16 and 20-22; and 35 U.S.C. 103(a) rejection to claims 3-5, 10-13, 17-19 and 23-26 of the final rejection sent on 04/01/2009, have been withdrawn in light of applicant's amendment/arguments filed on 06/01/2009 and 09/01/2009; wherein the prior arts of record fail to fairly show or suggest of processing signaling for a voice call to generate a query to a *call center* having a plurality of devices *within the call center*, and transmitting the query to the *call center*; and wherein the *query response includes a packet address that identifies a device* from among the plurality of devices *within the call center* (see REMARKS, pages 2-4, on 06/01/2009 and 09/01/2009).

Allowable Subject Matter

3. Claims 1-13 and 15-26 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The Terminal Disclaimer filed 09/20/2007 and 12/11/2008 have overcome all outstanding application, respectively. The Applicants' amendment/arguments in the response filed 06/01/2009 and 09/01/2009 have been fully appreciated and considered. Thus, the prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed system (claim 15) and method (claim 1) for operating a telecommunications network, which comprises “*receiving signaling for a voice call; processing the signaling to generate a query to a call center having a plurality of devices within the call center; transmitting the query to the call center; receiving a query response wherein the query response includes a packet address that identifies a device from among the plurality of devices within the call center; transferring communications for the voice call to the device in packets wherein the packets include headers having the packet address allowing the call to be routed within the call center to the device without requiring translation within the call center.*” structurally and functionally interconnected with other limitations in a manner as recited in claims 2-13 and 16-26.

4. References US 6,064,667 A; US 6,363,411 B1; US 6,920,214 B1; US 7,088,812 B1 and US 7,209,964 B2 are cited because they are put pertinent to control and manage for voice calls in telecommunication networks. However, none of references teach details as recited in claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2471

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
